

Integral patient care

The patientservice is a service of the MedicalService-Group for patients who want to be diagnosed and treated in Germany. Accordingly to the concept of our company, to be permanent and single point of contact for our clients, the goal of our patientservice is to assure the complete organisation and handling of treatment in German hospitals. As ill people fell in an exceptional situation, we consider it important to keep our patients from all organizational and bureaucratic requirements and we take over these tasks. In summary, with this concept we want to create the abidance and treatment in Germany so little stressful and pleasant as possible.
